**Econometric Analysis - National Dong Hwa University**

Econometric Analysis is the first-year graduate course in econometrics. The course aims at equipping the students with the knowledge for econometric theory and advanced empirical analysis, especially in the fields of finance and economics. Thus, the focus is placed upon methodology rather than proving statistical theorems.

**ECONOMETRICS**

Econometric theory concerns the study and development of tools and methods for applied econometric applications. Applied econometrics concerns the application of these tools to economic data. Economic data analysis requires data for analysis. The quality of the study will be largely determined by the data available.

**Advanced Econometrics - DIW**

"Econometric Analysis of Cross Section and Panel Data" The course will regularly discuss the causal interpretation of econometric estimates. The focus of the course is both on understanding the methodological concepts and on how to apply them. Students will learn to implement the estimation methods using the econometric package Stata.
